# The Gravestone Exhibition

2-4 June 2017 r., Kielce, Poland

The Gravestone Exhibition – the debut edition is to be held from **2nd to 4th June** within the scope of the International Funeral and Cemetery Fair **NECROEXPO 2017**.

There is much more to professional funeral services than the interment and funeral formalities; a comprehensive service scope has recently been expanded to include grave stone selection and purchase. The funeral services sector has been rapidly developing; in order to keep the pace with the changes we have resolved to hold the Gravestone Exhibition. We thus want to meet the demand of the exhibitors and expand the exhibition branch range. We believe that this will make the expo even more attractive.

Not only has the exhibition become Poland's largest business sector expo; in the recent years it has also grown to be the biggest Central and Eastern Europe's funeral and cemetery trade fair. The Polish expo also enjoys the largest number of business insiders who are the trade fair visitors. The exhibition brings visitors from almost 20 countries of the world. The Targi Kielce's trade fair is held on alternating years. Additionally the exhibition is accompanied with Poland's largest Stock Exchange of Used Hearses and Electric Vehicles

New models of coffins launched into the market, urns, state of the art computer software for funeral service management or for cemetery administration – these are just a few examples of novelties and curiosities put on display in Targi Kielce. Companies which deal in funeral ceremony accessories manufacturing also present their latest offer at the expo. The exhibition creates a unique chance to become familiar with the diversity of offer in this business sector, ranging from transport services, through conducting a funeral ceremony to cemetery design, maintenance and administration.

This year's exhibition edition has been complemented with the Florist Expo and the Gravestone Exhibition. It is our ambition and aspiration to satisfy the exhibitors' demand as well as to provide world class services; thus we have resolved to expand the trade fair offer.

The Gravestone Exhibition is a perfect showcase for grave-stone producers and distributors and a meeting platform with funeral houses which wish to expand the scope of their services. You are most welcome to join and create the Exhibition. This new exhibition demonstrates the potentials for becoming an indispensable part of NECROEXPO; one of Europe's largest and most prominent funeral sector trade fairs.
