Joint Stock Company “Gomel Plant of Foundry and Fasteners” (JSC “GZLiN”) was founded in 1979. The plant is specialized in production of maize, grass and rotary headers for forage technique, grain reapers, systems of the integrated agriculture, fasteners and consumer goods.

Foundry - grey and high-strength cast iron, aluminium and bronze alloys, ZAM (zinc, aluminium, copper) alloys, plastics.

The Affiliate realizes a complex preparatory production of casting semi-products including development of technical documentation according to a product sample and technical requirement, production and test of the technological rig, delivery of test batch of castings and serial products.

Joint Stock Company “Gomel Plant of Foundry and Fasteners” produces:

COMPLEX AND ORDINARY SHAPED CASTINGS FROM CAST IRON GCI-20, HSCI-45, HSCI-50:

- castings for agricultural machines, trailers, lorries, load-lorries
- hubs castings from GCI-20, HSCI-45, HSCI-50
- brake drums castings from GCI-20, HSCI-45, HSCI-50;
- reduction gear cases castings from GCI-20, HSCI-45, HSCI-50;
- gear boxes castings from HSCI-45;
- turbine boxes castings from HSCI-45;
- pulleys castings from GCI-20 and others;
- castings for railways:
- scraper shoe 316.30.41.140 from GCI-20 mechanically treated;
- scraper shoe TD-3.026.00.01.002 from Babbitt-GCI-1 with mechanical treatment;
- arm 316.30.10.191;
- guide bushing 11D 40.78.19. from Babbitt-GCI-1;
- valve guide 4-14-7401-000/2 from GCI-20
- “anchor embed” for spring rail binders drawing ISHZHD 7.004-00.00.00;
- cast iron brake shoe – type “M” - for locomotives GOST30249-97, drawing ISHDZH.720-00.00.00

SB

The Affiliate “Separated Foundry Production” has certified the cast iron brake shoe – type “M” for locomotives GOST 30249-97

- in the State Organization “Certification Register for Federal Railway Transport” (RS FZHT), Moscow, for conformity to safety norms requirements NB ZHT TM 02-98;
- in the National System of Conformity of the Republic of Belarus;
- in the Ukraine State Committee on Technical Regulation and Consumption Policy of the State Certification System;

DIECASTING AND CHILL CASTING FROM NON-FERROUS ALLOYS (ALUMINIUM AND ZAC); CASTINGS FROM PLASTICS IN SIZE TO 200 sm.

The manufacture of casting from cast-iron and non-ferrous alloys has been certified to conformity with Quality Management System requirements of STB ISO 9001-2009

The purpose of participation in the exhibition: expansion of markets for products, search for new partners in the sale of products, search for proposals for the supply of foundry equipment
