**About production of iron and steel casting
by LOST-FOAM**

Dear sirs!

Our company takes orders for production of iron and steel casting by LOST-FOAM.

Technology of production of iron and steel casting by LOST-FOAM has a number of significant advantages over other methods of production, which are traditional for foundries, and allows:

- to receive surface smoothness of casting Rz40, with weight and dimensional accuracy 4-10 class by GOST 26645-85;
- to work with all existing sorts of cast iron (from GG15(DIN) to GGG50(DIN) and other sorts), and steel (from GS-52(DIN) and higher carbon content);
- to make individual castings of complex configuration;
- to produce castings from 5 to 1000 kg and with maximum dimensions 1500*900*700mm.

Our customers are «BELAZ» (Belarus), «Amkodor» (Belarus), «NETZSCH Tula» (Russia), «EUROLLS» (Italy), «Kalvis» (Lithuania) and others.

We offer you to place your orders on a regular basis.

More information about our production can be found on the website www.nanosplav.com

P.S. The present investment plan's development mission is the reasoning of technical capabilities and economic efficiency of realization of the investment project «Construction of a foundry plant on an automatic moulding line basis»

With the hope of cooperation

**Director NanoSplay LLC
