# INDUSTRIAL SPRING MARKS THE START OF THE INDUSTRY'S NEW SEASON

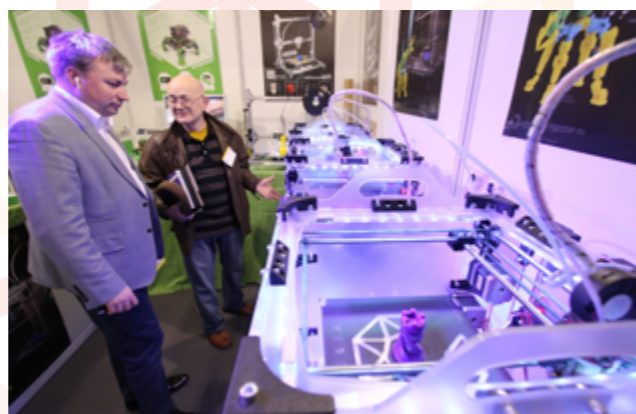

TARGI KIELCE'S INDUSTRIAL SPRING IS THE COMPREHENSIVE B2B EVENTS CYCLE DEDICATED TO METAL PROCESSING. THE EVENTS' BROAD-SCOPE IS A RESPONSE TO THE RAPIDLY-DEVELOPING METAL-INDUSTRY'S NEEDS.

## NUMBER OF VISITORS OVER THE YEARS

26-28 March 2019 - this is when the expo halls become the showcase for metal processing machines, machining appliances, welding, sheet-metal cutting, complete production lines and ground-breaking 3D printers.

Exhibitors from home and abroad, extensive exhibition space, modern machines and cutting-edge technologies on display, and constantly increasing number of visitors - every year in March Kielce is the world's industrial capital!

INDUSTRIAL SPRING - A PERFECT OPPORTUNITY TO ESTABLISH BUSINESS AND TRADE RELATIONS AS WELL AS TO SELL THE PRODUCTS ON SHOW.

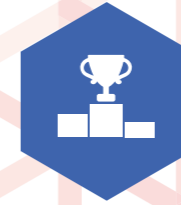

satisfied expo visitors

95%

satisfied exhibitors

98%

The Central - Eastern Europe's biggest 3D printing and scanning expo

The event grows and advances with every consecutive edition

More than 60% of exhibitors consider the expo the industry's most important event of the year

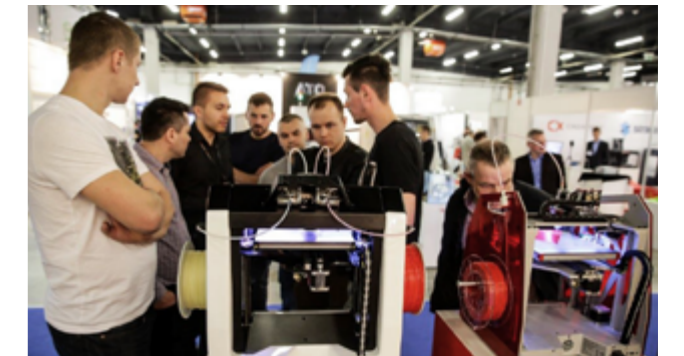

Every consecutive year the event has seen more and more companies which professionally deal with 3D printing.

FOLLOWING MANY-YEAR TRADITIONS, THE EXHIBITION IS THE SHOWCASE FOR THE COMPREHENSIVE 3D AND RELATED INDUSTRIES OFFERING .

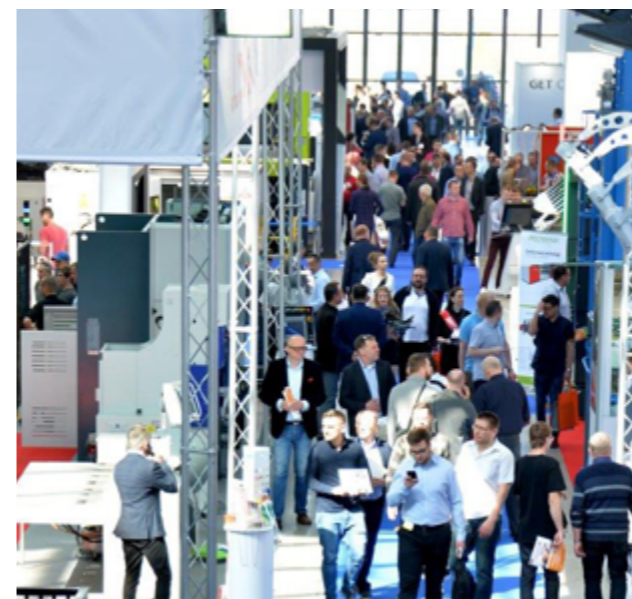

THE TARGI KIELCE'S INDUSTRIAL SPRING - INDUSTRIAL ONE-STOP-SHOP HELD AT THE SAME TIME

Industrial Spring - facts and figures:

According to exhibitors' opinion, the most important factors that have influenced their decision to join the Expo:

- Always-increasing number of visitors
- The expo prestige
- Affordable prices
- Excellent customer-service quality
- Well-established position of the exhibition centre
- Extensive accompanying events programme (conferences and seminars, etc.)

The event is complemented with the International Trade-Shows - the Exhibition of Metal Processing Technologies STOM, the EXPO-SURFACE, CONTROL-STOM, Kielce Fluid Power, WIRTOPROCESY, WELDING.

Admission to the 3D Printing Days Expo (and the Industrial Spring events cluster in Targi Kielce) free of charge, prior registration required.

## 3D PRINT DAYS 2018 - ACCORDING TO THE EXHIBITORS' OPINION:

Michał Melon, Chief Executive Officer of UBOT 3D

We started our business activity three years ago and then, for the first time we also exhibited at Targi Kielce. We had a small stand of 8 sq m. Year after year our expo stand has expanded, because the 3D Printing Days attract well-targeted audience, the expo visitors do know what they need. We will certainly come back next year.

Tomasz Weis Head of the 3D BIBUS MENOS Printing Department

Bibus Menos already boasts more than 12 years of experience in the 3D printing industry. We are considered a consultancy and commercial company. Therefore we have come here to support our prospective clients from many areas already. We are glad that the interest in this event has increased over the years. We get lots of business leads and find actual customers here in Kielce. This Industrial Spring enjoys a really big advantage - the event whose scope is much more extensive than 3D printing industry. The expos bring together broadly defined industry sector. Visitors who call in regular expo stands with machines on display also visit us and find innovative solutions. Now they can use cutting edge technologies for what they have not been able to produce with the use traditional ones.

Engineer Bogusław Klein PhD., Product Manager at Laser TRUMPF POLSKA

This year's Targi Kielce's Industrial Spring has been excellent, just like all the previous editions. Lots of guests, many interesting conversations. The accompanying events plethora - 3D Printing Days and the additive manufacturing technology seminar also offer an important business meeting platform for us - this is where you can talk shop and specific issues.

Piotr Gutsche, Marketing Manager of 3D Phoenix

The STOM expo and its accompanying 3D Printing Days surprise us every year - the events organised with great panache, supreme organisational quality. The events have attracted a growing number of visitors. Our company keeps winning many promising business leads, establishes contacts and finds prospective partners for cooperation. A visit to the Kielce gives a comprehensive insight into our industry - thus we keep abreast of its extremely dynamic development. Each year gives a very optimistic vision of the future - the industry and technology in Poland have been at par with the western markets. This is what we intend to showcase at our expo stand and thus promote many Polish producers. We invite you to visit the Phoenix 3D booth next year. We will definitely be here to showcase surprising new products!

### WE LOOK FORWARD TO SEEING YOU
